A Different Kind of Learning...

"VetPD is the Gold-Standard by which every other hands-on workshop or online continuing education organised by any group worldwide, should be measured. I have not come across any better veterinary continuing education than VetPD's!"
- Dr. Ben Chilvers, Priors Farm Equine Surgery, England

"I do want to congratulate VetPD on its professional Online Learning Center. I am aware of how challenging it is to assemble good-quality CE material online. Based on how far and wide the participants signed in from, VetPD is clearly known for doing a great job!"
- Prof. Margo Macpherson, University of Florida

In-Depth & Interactive Online Lecture Series with World-Renowned Specialists

- Live-Streams & Extensive On-Demand Library
- Aimed at experienced general practitioners
- 3 - 30 hours long
- Covering all disciplines
- Certificates of Attendance

Advances in Orthopaedic Therapies

Fri 3 - Sat 4 November

Rainbow Equine Hospital, York, UK

The following orthopaedic therapies will be interactively discussed via an evidence-based approach and the speakers will also explain how they personally use these modalities: Autologous conditioned serum & protein solutions, alcohol-facilitated ankylosis, PrP, acellular amnion, autologous vs. allogeneic stem cell therapy, new OA therapeutics (i.e. polyacrylamide hydrogel), bisphosphonates, Adequan/Cartrophen, nutraceuticals, intra-/extra-articular corticosteroid & hyaluronan, sports horse surgeries etc. Alcohol-facilitated ankylosis of the distal tarsal joints and ultrasound-guided injections will be trained on equine specimens and simulators as part of the wetlabs.

Advances in Foot Lameness & Farriery

Fri 17 - Sat 18 November Mälaren Hästklinik AB, Stockholm, Sweden

This course approaches the subject of farriery and therapeutic shoeing in a scientific and as objective way as possible by reporting established facts and recent, cutting-edge findings from scientifically sound clinical studies. The anatomy, physiology and biomechanics of the foot will be covered, followed by lectures on trimming, shoeing, different shoe types, what effect they have on the foot, how to examine the foot and how to deal with specific foot problems. The 7 hours of practical sessions will give attendees plenty of opportunity to put theory into practice on live horses and limb specimens in small groups (2 vets per specimen) and to discuss all aspects of foot trimming, shoeing, foot radiography and general farriery with the specialists.

Practical Ophthalmology

Tue 3 - Wed 4 October

Mälaren Hästklinik AB, Stockholm, Sweden

This highly practical course was conceived to help veterinarians from mixed and equine practice learn how to systematically examine the equine eye and to provide an overview over the most important and common problems affecting the eye. As part of the 7 hours of wetlabs on live horses and specimens the internationally renowned equine ophthalmologists will help attendees to further develop their diagnostic and therapeutic skills in true small-groups.

Advanced Ophthalmology

Fri 6 - Sat 7 October

Pferdeklinik in Parsdorf, Munich, Germany

This course was devised for equine practitioners with a good working knowledge in equine ophthalmology and provides an update on recently developed cutting-edge diagnostic/therapeutic techniques and medications. The 7 hours of wetlabs will allow attendees to hone their practical skills on live horses and specimens in true small groups under the watchful eye of some of the most highly respected and experienced equine ophthalmologists worldwide.

Advanced Cardiology (max. 24 vets)

Fri 17 - Sat 18 March

Stephansmühle Medizinisches Pferdezentrum, Nuremberg, Germany

This course is aimed at equine clinicians with a good working knowledge of equine cardiology. The world-renowned speakers/instructors will cover heart murmurs, myocardial disease, tissue doppler imaging, echocardiography measurements, speckle tracking, 4D echocardiography, management of atrial fibrillation, right heart function, mapping/ablation of atrial arrhythmias and interpretation of exercising ECGs through lectures and 10 hours of echocardiography in small groups. (max. 4 participants per instructor) and interactive case-discussions.

Ultrasound-Guided Orthopaedic Injection Techniques & Therapies

Fri 3 - Sat 4 February	Pool House Equine Clinic, near Birmingham, UK
Fri 10 - Sat 11 March	Mälaren Hästklinik AB, Stockholm, Sweden
Fri 10 - Sat 11 November	Stephansmühle Medizinisches Pferdezentrum, Nuremberg, Germany
Fri 1 - Sat 2 December	DAP Equinox, near Antwerp, Belgium

Ultrasonography has become a crucially important diagnostic imaging modality and a growing number of equine orthopaedic specialists have extended its use creatively to assist with injection techniques and to facilitate minimally invasive surgery. This course was developed for equine practitioners to enhance their knowledge and practical skills of performing ultrasound-guided orthopaedic injections and ultrasound-assisted surgical techniques. Between both afternoons, 7 hours of practical sessions will provide the opportunity to train many different injection techniques on horses, equine specimens and anatomic replica simulators in true small-groups (2-4 vets per ultrasound machine).

Rehabilitation for Lower Limb Tendon & Ligament Conditions

Fri 3 - Sat 4 March Equi Vet Serwis, Poznań, Poland

Developed for equine practitioners & physiotherapists with a good working knowledge of distal limb tendonitis and desmitis, this course covers how to devise rehab protocols consisting of a combination of therapeutic exercise, use of different rehabilitation modalities and therapeutic shoeing to maximize horses' chances of returning to previous levels of exercise. The 7 hours of practical small-groups sessions on live horses and case-discussions will allow attendees to become familiar with therapeutic modalities and physical therapy exercises that can be passed on to horse owners.

Musculoskeletal Ultrasound

Fri 3 - Sat 4 March Northern Italy, exact location soon to be confirmed

This course provides equine practitioners with the knowledge and especially the practical skills to competently and confidently identify frequently encountered equine musculoskeletal conditions affecting the frontlimb, hindlimb and neck of the horse. The 7 hours of practical sessions in true small groups (2 - 4 vets per ultrasound machine) will provide attendees with extensive opportunity to hone their scanning skills at the following stations on live horses: Machine set-up, heel & pastern, digital flexor tendon sheath & annular ligament, fetlock region, flexor tendons & check ligaments, suspensory ligament (FL vs. HL), tarsus & tarsal sheath and the stifle joint region.

Oral Dental Extraction Techniques (max. 24 vets)

Fri 20 - Sat 21 January Pferdeklinik am Kirchberg, Munich, Germany
Sat 18 - Sun 19 February Hevosklinikka Equivet Oy, Helsinki, Finland
Fri 20 - Sat 21 October Equi Vet Serwis, Poznań, Poland

This 2-day highly practical boutique course (max. 24 attendees) is aimed at practitioners with a good working knowledge in equine dentistry who want to learn about various oral dental extraction techniques and how to apply them clinically. The specialists will share tips/tricks and pearls of wisdom especially during the 8 hours of practical sessions on equine specimens in true small groups (2-3 vets per specimen).

Introduction to Advanced Surgical Dental Extraction Techniques (incl. MITR, MTE & Segmentation; max. 18 vets)

Fri 3 - Sat 4 November Near Berlin, Germany – exact location soon to be confirmed

This 2-day highly practical boutique course (max. 18 attendees) was devised for advanced practitioners with surgical experience and surgeons with a good working knowledge/experience in equine dentistry, specifically with dental extractions. The world-renowned specialists will provide an overview on up-to-date surgical dental extraction techniques in horses, including minimally-invasive trephination & repulsion (MITR), minimally-invasive transbuccal extraction (MTE) and dental segmentation. During the 9 hours of wetlabs in true small groups (2-3 vets per specimen) attendees will be able to further develop their surgical skills and familiarise themselves with modern MITR and MTE techniques under the close supervision of the highly experienced specialists.

Introduction to Endodontics & Restorative Dentistry (max. 18 vets)

Fri 8 - Sat 9 December Tiergesundheitszentrum Isernhagen, Hannover, Germany

This very practical 2-day boutique course (max. 18 attendees) is aimed at practitioners with a good working knowledge in equine dentistry who would like to start performing equine restorative and endodontic dentistry. Theory, discussion, and practical training in endodontic and restorative techniques will be given by three prominent European Equine Dental Specialists who will share tips/tricks and pearls of wisdom particularly during the 8 hours of practical sessions on equine specimens in true small groups (2-3 vets per specimen).

Equine Alaskan Mushing CE Experience

4 - 8 February 2023

Happy Trails Kennels, Big Lake, near Anchorage, Alaska

(1.5h from Anchorage International Airport)

Sports Horse Orthopedics & Musculoskeletal Imaging (18hrs)

Dr. Lauren Schnabel

DVM, PhD, Dipl.ACVS, Dipl.ACVSMT – North Carolina State University, USA

Dr. Kurt Selberg

MS, DVM, Dipl.ACVR – Colorado State University, USA

Included in the 5 days: 18 hours of lectures & case-discussion • 2 hour wilderness sled dog ride • Half-day trip learning how to drive own sled & team of dogs • Optional all-day mushing trip with your own team of sled dogs • Optional alternative outdoor activities

Internal Medicine Challenges for Advanced Practitioners

Fri 27 - Sat 28 January

Near Berlin, Germany – exact location soon to be confirmed

This course was designed for equine practitioners with a good working knowledge in internal medicine. Each topic will be addressed via interactive case discussions allowing speakers to share pitfalls, erroneous clinical conclusions and useful tips and tricks. The 7 hours of practical sessions on live horses/specimens will cover: Ultrasound-guided CSF collection, GI tract, liver & renal ultrasound (incl. biopsy techniques), arrhythmia/endocrine case discussions, respiratory endoscopy (incl. BAL/TW), ophthalmologic procedures & ocular ultrasound.

Advanced Mare Reproduction

Fri 25 - Sat 26 August

Exact Location soon to be confirmed

This highly practical course has been developed for equine veterinarians and mixed animal practitioners with a good working knowledge in the field of mare reproduction and provides a critical update on the problem mare and a comprehensive introduction to embryo transfer in equine stud medicine. Attendees will rotate through 7 hours of practical small-group sessions (2-4 attendees/ultrasound machine) at the following practical stations: Transrectal Ultrasound & Uterine Sampling Techniques; The Pregnant Mare – Transrectal (video) & Transabdominal Ultrasound; Harvesting Oocytes after Sudden Death; Embryo Flushing; Embryo Handling & Transfer; Ovum Pick-Up Demonstration.

Back, Sacroiliac & Pelvic Problems of the Horse

Fri 5 - Sat 6 May

Fri 22 - Sat 23 September

Fri 6 - Sat 7 October

Bjerke Dyrehospital, Oslo, Norway

Pferdeklinik am Kirchberg GmbH, Munich, Germany

Pool House Equine Clinic, near Birmingham, UK

Many sports horses suffer from debilitating conditions affecting the back, pelvis and sacroiliac region. The topics covered through lectures and wetlabs on this course include amongst others up-to-date therapies; back, pelvic & hip ultrasound; saddle fit assessment and sacroiliac & facet joint injection techniques on equine anatomic replica simulators and trainers.

Orthopaedic Radiography & Comparative Imaging for Advanced Practitioners

Fri 10 - Sat 11 February
Fri 17 - Sat 18 March
Fri 29 - Sat 30 September
Fri 27 - Sat 28 Oct 2023

Tiergesundheitszentrum Isernhagen, Hannover, Germany
Pool House Equine Clinic, near Birmingham, UK
Lingehoeve Diergeneeskunde, Utrecht, Netherlands
Tierklinik Leimental, Basel, Switzerland

Musculoskeletal imaging is discussed by comparing radiography with other complementary imaging modalities accessible to equine practitioners (especially ultrasound, but also MRI, CT and PET) through which additional information can be gained. The 9 hours of wetlabs (x-ray and ultrasound) on live horses and multi-modality case discussions provide plenty of opportunity for attendees to further develop their radiography, ultrasound and image interpretation skills under the supervision of equine diagnostic imaging clinicians.
